

## ALPINE AUTO GALLERY LLC

Alpine Motor Cars, which later became Alpine Auto Gallery, has its roots dating back to 1988.

Two brothers opened a small yard on Bruckner Blvd in the Bronx to sell rebuildable and salvage automobiles. The company quickly outgrew its location and moved blocks away to a 50,000 sq/ft facility on Bronx River Ave. The company was at that location for over 15 years with over 18,000 late model rebuildables sold. Our current facility in Paterson, New Jersey gives clients quick access to major highways and local shipping ports. Our container service has the shortest delivery time to Europe, usually within three weeks. Over the years, Alpine built a network of buyers and sources to acquire quality Repairables. You can often see those hard to find exotics, SUV's other luxury automobiles at our location.

If transportation is your concern, we can easily deliver cars both locally, nationally and International quickly. Our dispatch system can move salvage vehicles quickly, efficiently and at tremendous savings. We have in house staff that now offers logistical assistance to all major ports; we even have an office in Munich Germany to better assist all our European Clients.

A strong customer service belief has helped many of our existing clients not only with the acquisition of their vehicle but throughout the entire rebuilding process. Our years of experience and knowledge have helped all our customers make the right choices when it comes to purchasing salvage vehicles. Contact us and you'll soon realize your dealing with a different type of company. What ever your needs, the Alpine team can help. Visit the company Website for a quick tour.

You won't be disappointed
