

ABOUT GOTPARTS

In 2001 DJW Equipment started a dismantling business for used truck parts for pick up trucks, medium duty trucks, and heavy duty trucks, including used RV parts and 5th wheels. We have been in business since 1991 when we started as a heavy equipment and specialized off-road 4x4 chassis manufacturer here in Northern California.

GOTparts has a large inventory of used truck parts such as gas and diesel engines, transmissions, transfer cases, axles, and many hard to find parts. To quickly locate the parts you need, GOTparts is connected to several online databases, providing you with a large inventory for quality used truck parts. We also have a growing selection of complete vehicles, including medium duty box trucks, flatbeds, and cabs & chassis, as well as heavy duty trucks and trailers.

Our mission is to be an effective resource for used trucks and truck parts. It is our goal to provide outstanding service from our knowledgeable sales staff, and to provide quality service in locating and delivering the parts and trucks you need to get the job done.
